ABOUT US

STONE CENTRE

Urinary stone disease is a painful condition. Led by two well-experienced urology consultants and surgeons, Beacon Stone Centre is dedicated to providing comprehensive, safe and reliable care for all our patients with various urinary conditions. We offer a wide range of medical, diagnostic and evidence-based treatments in one location. We utilize non-invasive or minimally invasive procedures for painless removal of small and large stones and we have treated more than 20,000 cases with a success rate* of 99%. Wherever the location and whatever the size, all urinary stones can be treated in Beacon Stone Centre.

**Success defined as stone free or residual fragments less than 3mm in size.*

MEN'S HEALTH CENTRE

At Beacon Men's Health Centre, the health needs of men are our main concern. We

provide a platform which makes it easier for men to talk about their health problems and understand their own health needs. Our team of doctors are experts in urology and men's sexual health with more than 28 years of experience. They have published numerous journal articles and books on erectile dysfunction and men's health. We offer the diagnosis, treatment and prevention of various health problems that

typically affect men. We are dedicated to taking care of men's health from their 20s to their 70s. Over the years, we have helped thousands of men return to their healthy life and avoid further health problems.
